

# GMK5250L

Product Guide  
ASME B30.5  
Imperial 85%

## Features

- 250 t (300 USt) capacity
- 70 m (230 ft) seven-section main boom
- 21 m (69 ft) swingaway with jib and/or boom inserts.
- Maximum 37 m (121 ft) length and up to 50° offset.
- VIAB turbo retarder clutch
- Single engine design - less fuel consumption

# GROVE GMK5250L

The GMK5250L puts power and performance to work for you with high capacities on a five-axle all-terrain crane and 70 m (230 ft) main boom.

## Features

### > VIAB Turbo Clutch

The Grove GMK5250L is the first all-terrain crane to utilize a VIAB turbo clutch module, which is used by a number of heavy duty trucks. It enables wear-free starting and breaking, avoids overheating and burning, and reduces fuel consumption to a minimum; adding substantial fuel savings of approximately 30 % compared with its predecessor, the GMK5275. VIAB is a turbo coupling and integrated retarder all-in-one, which means less weight and less space, and it comes as standard on the new Grove crane.

### > Convenient transportation logistics

Logistic benefits due to interchangeable counterweight slabs and self-rigging auxiliary hoist. Once on the job site, the crane can be moved while carrying its full counterweight of 80 t (176,300 lb), and its ability to travel in this configuration saves valuable time on the job that would otherwise be taken up with installing and removing counterweight sections. Besides this some of the counterweight slabs are interchangeable with those of the GMK6300L. The self-rigging auxiliary hoist eliminates the need for an assist crane during on-site rigging.

### > Superior strength and reach

Boosting overall reach is a 21,3 m (69 ft) hydraulic swing-away jib, which can be extended with either an 8 m (26 ft) boom extension, two 8 m (26 ft) jib inserts, or a combination of both for a total possible jib length of 121 ft. For optimum usage, the full jib can be also operated while the crane is working with its full 70 m (230 ft) boom length extended. Another beneficial feature of the jib is its ability to offer increased offset of up to 50° compared to a typical 40° offset on other Grove cranes in its class; plus there is an optional integrated heavy duty jib available.

### > **CraneSTAR®**

**CraneSTAR is an exclusive and innovative crane asset management system**

that helps improve your profitability and reduce costs by remotely monitoring critical crane data. Visit [www.cranestar.com](http://www.cranestar.com) for more information.

## Job site benefits

- Five outrigger positions provide ultimate flexibility for job sites with the ability to position the crane in tighter spaces.
- Mercedes engine and transmission with VIAB turbo clutch for premium maneuverability, optimized fuel consumption and powerful integrated retarder.
- Job site movement with full counterweight saves setup time.
- The GMK5250L is designed with a self-rigging auxiliary hoist, saving time and costs associated with operating an assist crane.
- Available swingaway configurations and extensions provide excellent flexibility and reach with up to 37,3 m (121 ft) and a 50° offset to reach over obstacles.
- Higher utilization with load charts usually offered by six-axle cranes.

### Manitowoc Crane Care when you need it.

The assurance of the world's most advanced crane service and support to get you back to work fast.

### Manitowoc Finance helps you get right to work generating profits for your business.

Financial tools that help you capitalize on opportunity with solutions that fit your needs.

\* Luffing under load

### The lifting capacities correspond to ASME 30.5

The lifting capacities likewise fulfil the requirements of SAEJ1289 and ISO 4305 with regard to stability.

The lifting capacities are given in 1,000 lbs.

Lifting capacity = Payload + weight of hook block and suspending device.

The lifting capacities for the main boom only apply with the jib dismantled.

Lifting capacities > 133 t (294,000 lb) require additional equipment.

Lifting capacities > 179 t (394,000 lb) require special equipment.

The right is reserved to modify the load-carrying capacities.

**Note:** The details in this brochure serve only as general information. The determinant values for the operation of the crane are the lifting capacity tables belonging to it and the operating instructions.

Lifting capacities are indicated by boom length for different levels of extension. The actual boom length will be in accordance with the selected configuration for boom extension.

THIS CHART IS ONLY A GUIDE AND SHOULD NOT BE USED TO OPERATE THE CRANE.

The individual crane's load chart, operating instructions and other instructional plates must be read and understood prior to operating the crane

# Specifications

## Superstructure

### Boom

13,3 m to 70,0 m (43.5 ft to 229.7 ft) seven-section TWIN-LOCK™ boom. Maximum tip height 73,0 m (239.5 ft).

### Boom elevation

1 cylinder with safety valve, boom angle from -1.5° to +82°.

### Load moment and independent anti-two block system

Load moment and independent anti-two block system with audio visual warning and control lever lock-out. These systems provide graphic display of boom angle, length, radius, tip height, relative load moment, maximum permissible load, load indication and warning of impending two-block condition with lock-out hoist function.

### Cab

Aluminium, full vision, tiltable (approx. 20°), safety glass, adjustable operator's seat with suspension, engine-independent heater. Armrest-integrated crane controls. Ergonomically arranged instrumentation and crane operating controls.

### Slewing

3 slewing gears with axial piston motors, planetary gears, automatic break.

### Counterweight

80 tonnes (176,300 lb), consisting of various sections (50 t [110,200 lb] within 3,00 m [9.84 ft] vehicle width). Hydraulic removal system.

### Hydraulic system

2 separate circuits, 1 axial piston variable displacement pump with electronic power limiting control and axial piston variable displacement pump for slewing. Thermostatically controlled oil cooler. Tank capacity: 890 l (235 gallons).

### Control system

Full electronic control of all crane movements using electrical control levers with automatic reset to zero. Integrated with the RCL and engine management system by CAN-BUS. Crane Control System (CCS) with system with graphic display.

### Hoist

Axial piston motor with planetary gear and brake. Drum rotation indicator. Hoist camera with light.

### \* Optional equipment

- Bi-fold swingaway, 12/21 m (39/69 ft)- with hydraulic offset and luffing under load (5° - 50°), controlled from the crane cab.
- Boom extension, jib extension(s) 29/37 m (95/121 ft), consisting of bi-fold swingaway and 2 boom/jib extensions.
- Auxiliary hoist, self-rigging via counterweight
- Auxiliary boom nose using one part of line
- Auxiliary boom nose using two parts of line
- Air-conditioning system
- 2,0 m (6.6 ft) side stowed stub jib using 4 parts of line. Offset 8° and 30°

## Carrier

### Chassis

Special five-axle chassis, all-welded torsion-resistant box type construction in high strength steel.

### Outriggers

4 double hydraulically telescoping beams with vertical cylinders and outrigger pads. Independent horizontal and vertical movement control on each side of the carrier and from the operators cab. Electronic level indicator with automatic levelling system.

### Engine

Mercedes Benz OM471LA, diesel, six cylinders, water cooled, turbocharged, 390 kW (532 HP) at 1700 rpm (80/1269 EWG fan loose). Max. torque: 2460 Nm (1814 ft lb) at 1300 rpm. Fuel tank: 300 l + 350 l (79 + 92,5 gallons). Engine emission: Euromot 4 / EPA / CARB Tier 4 final (non-road).

### Transmission

Mercedes G 280 with VIAB -16 gears forwards and 2 reverse. 1-stage transfer case with longitudinal differential lock and VIAB turbo retarder coupling.

### Drive/Steer

10 x 6 x 10.

### Axle lines

5 axle lines, axle lines 2, 4 and 5 steered and driven. Axle lines 1 and 3 steered.

### Suspension

MEGATRAK®. All wheels with independent hydropneumatic suspension and hydraulic lockout. Longitudinal and transverse level control with automatic on highway levelling system. Range +170 mm/-130 mm (6.69 in/-5.12 in). Active suspension control on outrigger control units.

### Tires

10 tires, size 445/95 R25 (16.00 R25).

### Steering

Dual circuit, hydraulic power assisted steering with emergency steering pump. Axle lines 1, 2, 3 and 5 steer on highway (steer by wire). Separate electronic hydraulic (steer by wire) steering of the 4th, and 5th axle line for all wheel steering and crabbing.

### Brakes

Service brake: pneumatic dual circuit disc brakes acting on all wheels, air dryer. Permanent brake: exhaust brake and constant throttle brake. Parking brake: pneumatically operated spring-loaded brake acting on axle lines 2, 3, 4 and 5.

### Driver's Cab

Composite designed aluminium and fibre reinforced plastic, 2-person-design, safety glass, driver seat with pneumatic suspension, engine-dependent hot water heater. Complete instrumentation and driving controls. Air condition. 12 V plug. Two rotating beacons. Fire extinguisher.

### Electrical system

Three-phase alternator 28 V/100A, 2 batteries 12 V/170 Ah. Lighting system and signals 24 V.

### \* Optional equipment

- 10 x 8 x 10
- 10 tires, size 445/95 R25 (16.00 R25).
- 10 tires, size 525/80 R25 (20.5 R25). - Vehicle width 3,10 m (10.17 ft)
- Folding bunk bed in carrier cab.
- Engine-independent hot water heater, with engine pre-heater.
- Reverse camera system.
- Crane Star telematics system.

\* Other optional equipment on request.
